

Brand Guide Quick Reference

Version 1.0

At its core, the Reposit brand looks great and is easy to use. Here are some simple guides for what logo files, colours and fonts to use in your Reposit communications. They not only take out a lot of guesswork, they also ensure that everything has a consistent look and feel.

Missing anything? Not sure what to use where, or if it looks strange?

Logo Variations

STANDARD VERSION

Use this on white or light coloured backgrounds. Don't change the colour of the logo.

REVERSED VERSION

Use this on coloured, dark or photographic backgrounds. Don't stroke or add shadows/effects to the logo.

THE REPOSIT MARK

Use this as a graphic element when the audience will already be familiar with the Reposit name.

Logo Usage

EXCLUSION ZONE

Every logo has personal space. Reposit's logo needs at least the mark's size around it. Nothing should enter or on this space.

MINIMUM SIZE

Keep the logo at least 40mm in width, or 140pixels on screen, otherwise it will fall apart or worse, disappear entirely. Don't disproportionately scale, stretch or crop the logo.

PLACEMENT

The logo works best when it's on the left of applications. Avoid centering or placing on the right of an application.

Our Colours

PRIMARY PALETTE

Use these colours loud and proud, together or against a white background. Use percentage tints to create hierarchy and contrast.

SECONDARY PALETTE

Use these colours sparingly to differentiate messaging i.e. graphs, icons. Don't let the colours overpower the ones above.

PANTONE (PMS)

For spot colour printing i.e. Offset Printing, Signage and Screenprinted Tees.

CMYK

For process printing i.e. Brochures, Press Ads and Pull-up Banners.

RGB

For screen usage i.e. Web, Email, Video and App Interfaces.

Type Configuration

Here is an example of some text which has been nicely set using the styles above.

Heading 1: Raleway Light
18/21pt, Sentence case

Heading 2: Raleway Semibold
8.5/12pt, All-caps

Work Sans Regular
8.5/12pt, Sentence case

Reposit learns something new every day.

AN INTUITIVE SYSTEM THAT WORKS TO LOWER YOUR ELECTRICITY BILL.

Reposit gets to know you and your energy consumption patterns over time and adapts accordingly. Say you have your own morning routine, the coffee machine and toaster go on while you catch up online and give your phone a final charge, Reposit will learn to charge your battery.
